PROJECTS

Ask AI – Embeddable AI Assistant for Websites

TypeScript, Next.js, AI Workflow

Demo: [live demo link] · Code: [GitHub repo link]

- Built an embeddable “Ask AI” widget that lets any website answer visitor questions about its own product, features, and docs using natural-language interaction.

RAG-Based AI Document Assistant

TypeScript, LangChain, LangGraph

version 1: [live demo link] · Code: [GitHub repo link]

- Built a RAG-based AI document assistant supporting .md and .txt documents, leveraging semantic search and context-aware retrieval to achieve over 80% answer accuracy.

Secure Voice & Video Calling Platform

HTML, JavaScript, WebRTC, Socket.IO

Demo: [live demo link] · Code: [GitHub repo link]

- Developed a real-time browser-based voice and video calling platform using WebRTC with peer-to-peer streaming, end-to-end encrypted communication, and Socket.IO signaling.

Secure QR Code & Passkey Login

SimpleWebAuthn, Node.js, WebAuthn/FIDO2

Code: [GitHub repo link]

- Building a passwordless authentication flow with QR-code-based login and passkey (WebAuthn/FIDO2) support via SimpleWebAuthn for secure, phishing-resistant sign-in.

Android Screen Mirroring Platform

In Progress

Code:

- Developing a low-latency Android screen mirroring platform without USB debugging or root access, targeting sub-100ms end-to-end latency with secure real-time streaming.

Notification Platform

Coming Soon

Docs/Code:

- Designing a unified notification service for delivering real-time alerts across email, push, and in-app channels.
